Version:	<code>1.0.0</code>
-----------------	--------------------

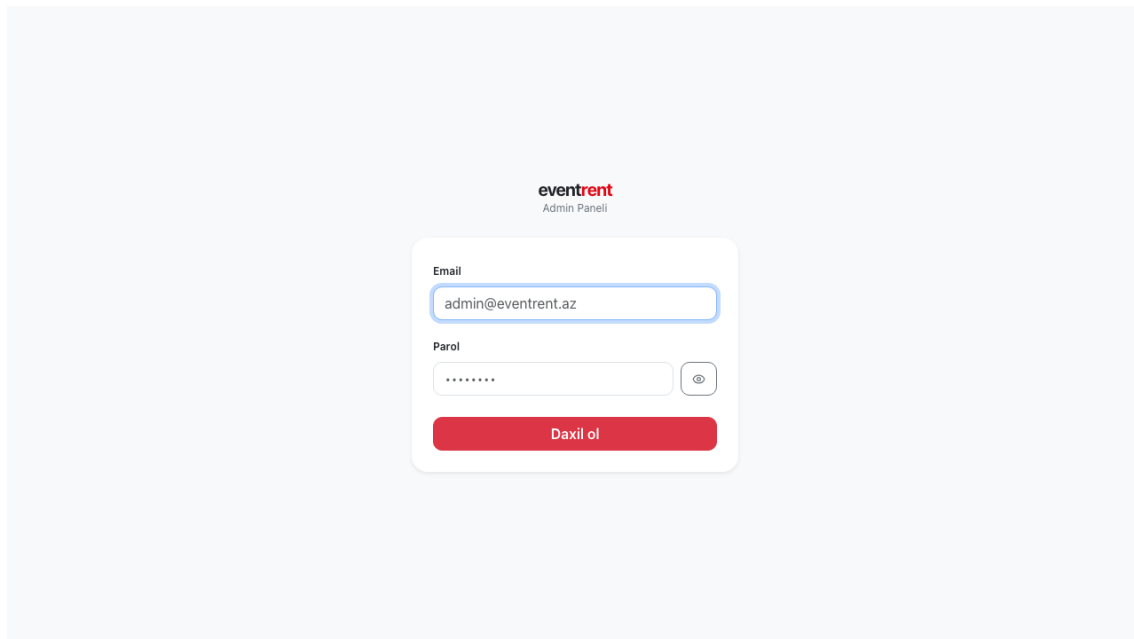

Date:	<code>2026</code>
--------------	-------------------

This document is the complete user guide for the Eventrent.az admin panel. All tabs, features, and workflows are covered with screenshots.

1. Logging into the Admin Panel

Follow these steps to access the admin panel:

- **URL:** <https://eventrent.octotech.az/admin>
- **Email:** alivalizada@eventrent.az
- **Password:** Your assigned password

Admin panel login screen

2. Dashboard (Home Screen)

After logging in, you are automatically redirected to the Dashboard. Here you can see real-time statistics for orders, leads, products, and conversion rates.

KPI Cards on the Dashboard:

- **Total Orders** — total number of orders for all time
- **New Orders** — unanswered / pending orders
- **Won** — completed and closed orders
- **Conversion %** — lead-to-order conversion rate

Order Details

Click on any order row — a details modal opens. It shows:

- **Customer info** — name, email, phone
- **Event info** — date, location
- **Products** — image, name, category, quantity, technical answers
- **Status change** — New > Contacted > Quoted > Won / Lost
- **Email notification** — send email to customer on status change

Order detail modal — full information view

4. Products

In the Products tab you can manage all catalog products. Switch between List view (AG Grid) and Card view using the toggle buttons.

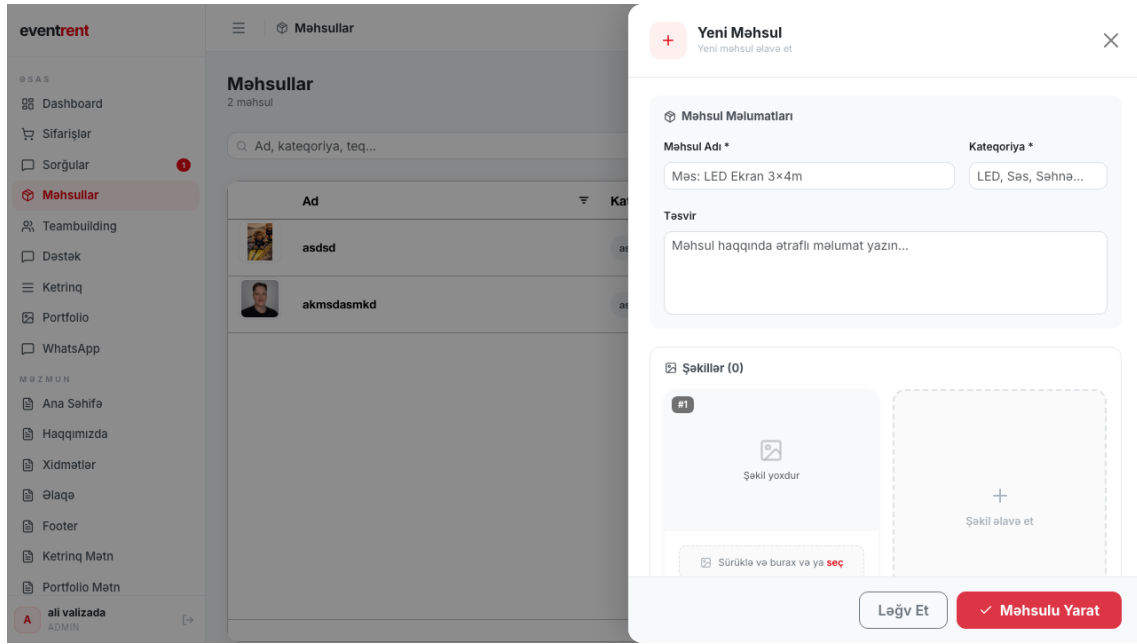

Products tab — AG Grid list view

Adding a New Product

Click "New Product" — an offcanvas panel slides in from the right:

- **Product Info** — name, category, description
- **Images** — drag & drop upload or enter URL directly
- **Metrics** — select from pre-defined metric templates
- **Tags** — add search tags for discoverability

New product — right-side offcanvas panel

Metric Templates

Click the "Metrics" button to open the right offcanvas. Here you create reusable specification templates that can be applied to any product. Available field types:

Type	Description	Example
Text	Free text input	Color: "Red"
Number	Numeric value + unit	Power: 1000 W
Select	Single dropdown	Material: Aluminum
Multiselect	Multiple choices	Colors: Red, Blue
Boolean	Yes / No toggle	Installation: Yes
Dimensions	W x H x D fields	100 x 50 x 30
Color	Color variant picker	Color: Black

5. Leads (Contact Requests)

All incoming contact requests from the website (contact form, WhatsApp, phone) are collected in the Leads tab. Each lead contains customer info, source, and status.

The screenshot shows the 'eventrent' dashboard with the 'Sorgular' (Leads) tab selected. The sidebar on the left contains navigation links for Dashboard, Sifarişlər, Sorgular (highlighted), Məhsullar, Teambuilding, Dəstək, Ketrinq, Portfolio, and WhatsApp. The main content area displays a summary of leads with four cards: Ümumi (1), Yeni (1), Qazanıldı (0), and Konversiya (0%). Below the cards is a search bar and a table of lead records. The table has columns for Müştəri, Tədbir, Məhsullar, and Status. A single lead record is shown for 'Test User' with email 'test@teslaaz' and phone '+994501234567'. The status is 'YENI' (New).

MÜŞTƏRİ	TƏDBİR	MƏHSULLAR	STATUS
Test User test@teslaaz +994501234567	—	—	YENI Yeni

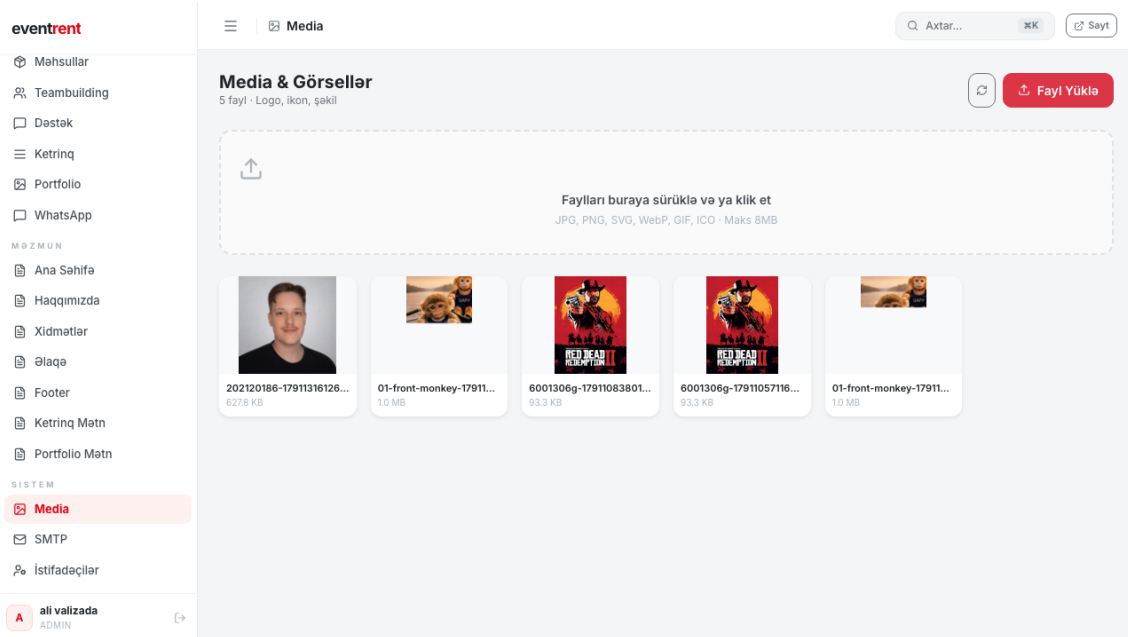

Leads tab

Lead Management:

- **Status change** — New > Contacted > Quoted > Won / Lost
- **Search** — filter by name, email, or phone
- **Detail modal** — full customer information and notes

6. Media Library

All uploaded images are stored in the Media tab. You can select images from here when editing products or site content.

Media tab — image library

Using Media:

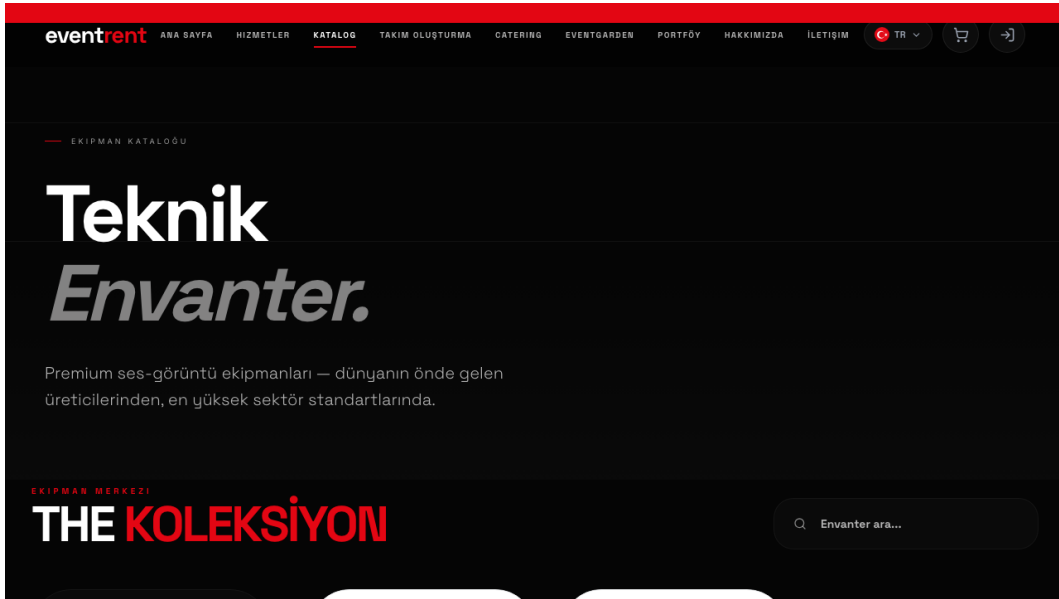

- **Upload** — drag & drop or click "Choose File" to add images
- **Select** — click "Select Media" from product/content editor
- **Delete** — remove images no longer in use

7. User-Facing Pages

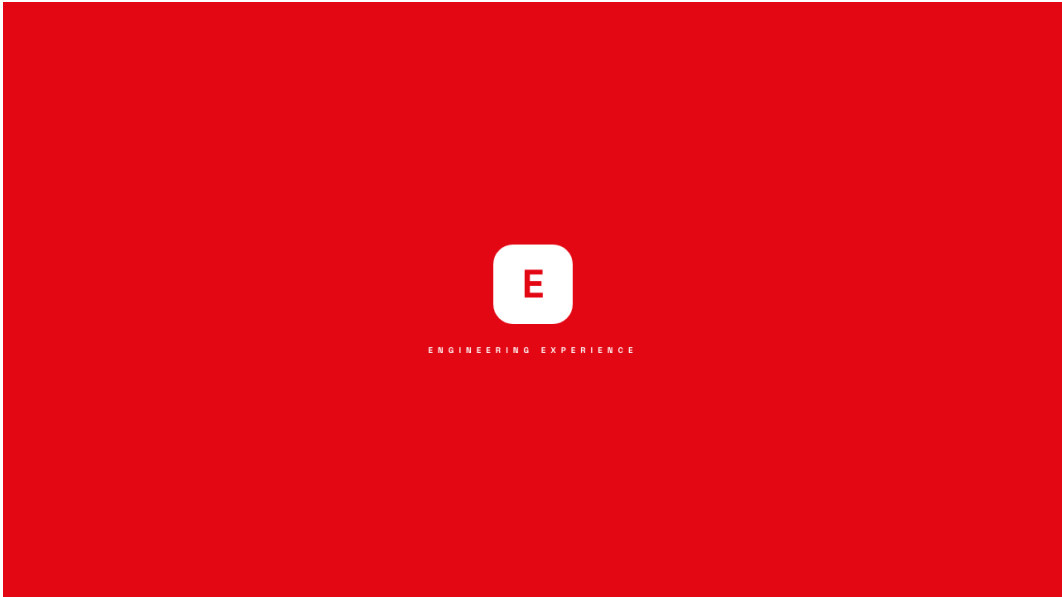

The screenshots below show what a real visitor sees on the website. All tests were conducted on <https://erent.octotech.az>.

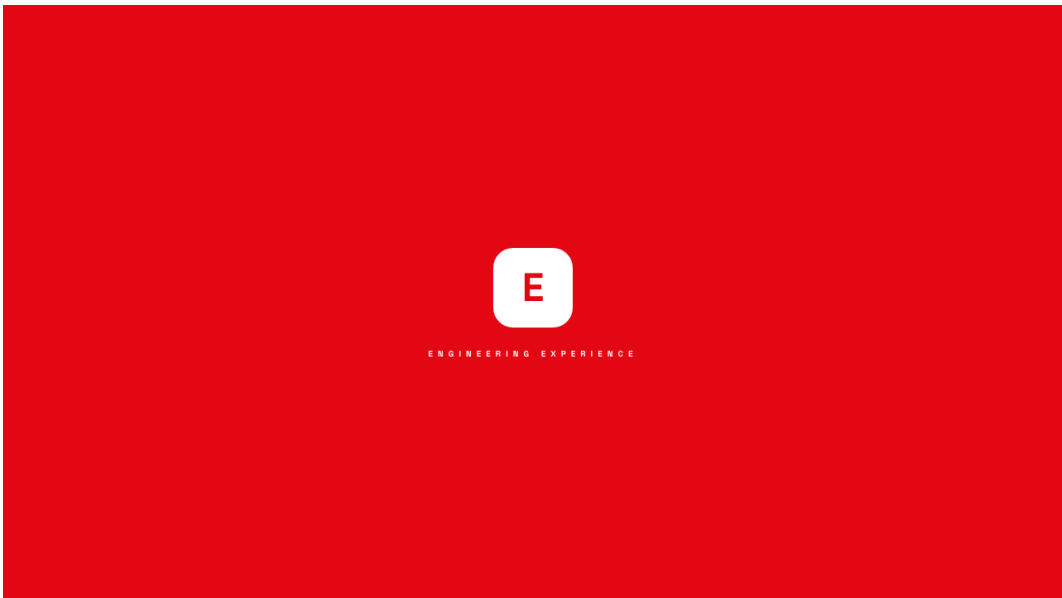

Home Page — Premium hero, services overview, catalog gateway

Catalog — Product listing, category filters, search

Catering — Package selection, OTP-verified order flow

Cart — Product list, technical specs, order form

8. Test Results

The following tests were conducted using a real Chromium browser on <https://erent.octotech.az>.

#	Test	Result
1	Home page loaded successfully	PASS
2	About page loaded	PASS
3	Services page loaded	PASS
4	Catalog page loaded	PASS
5	Teambuilding page loaded	PASS
6	Catering page loaded	PASS
7	Portfolio page loaded	PASS
8	Contact page loaded	PASS
9	Cart page loaded	PASS
10	API /health — {"ok":true}	PASS
11	Wrong password rejected (401)	PASS
12	Admin login successful	PASS
13	Orders tab + detail modal	PASS
14	Products tab + new product offcanvas	PASS
15	Leads tab loaded	PASS
16	Media tab loaded	PASS
17	Content Studio loaded	PASS
18	Users tab loaded	PASS
19	XSS protection active (429)	PASS
20	Auth middleware (orders:401, users:401)	PASS

20 / 20 TESTS PASSED — 100% SUCCESS

9. Technical Information

Frontend	React + TypeScript + Vite + TailwindCSS
Backend	Node.js + Express + SQLite (better-sqlite3)
Auth	JWT (7-day token)
Upload	Multer — /datastore/eventrent/uploads
Database	SQLite — /datastore/eventrent/data/eventrent.db
Deploy	Docker + Traefik + Cloudflare Tunnel
CDN	Cloudflare — automatic SSL/TLS
OTP	WhatsApp — @whiskeysockets/baileys
Email	SMTP (Nodemailer)
Rate Limit	express-rate-limit (Traefik proxy aware)
